The PowerBuilder Foundation Class Library (PFC) is a set of PowerBuilder objects that are customized and used to develop class libraries. These objects can be used to provide corporate, departmental, or application consistency. PFC also includes objects that are used as is for utility purposes, such as debugging.

A Brief Overview of PFC. The PowerBuilder Foundation Classes (PFC) were introduced with PowerBuilder 5 and enhanced in PowerBuilder 6. PFC is a set of PowerBuilder objects that provide the basis for developing robust PowerBuilder applications. PFC objects provide a consistent framework that can be used across PowerBuilder applications.

The PowerBuilder Object Tagger tags object so that you can search for them by name within the PowerBuilder IDE. This tool operates on exported text object files and is intended to be used with a target under source control.
