The most common compounding you are likely to do is preparation of intravenous (IV) solutions.

### How to ace pharmacy calculations | Career Feature ...

In Pharmacy Calculations for Pharmacy Technicians: Concentrations, Dilutions and Drug Dosing the

focus is shifted to drug concentrations, dilutions, and individualized drug dosing. The goal of this activity is to ensure that doses of medications are appropriate for each individual patient.

### Pre-Reg Pharmacy Exam Calculations | ResourcePharm Pharmaceutical Calculations eBook PDF Free Download | FBFA

The Pharmacy Technician Certification Board (PTCB ®) brings you a calculations practice test comprised of questions used on previous PTCE ® examinations. The app contains 138 questions with detailed answer explanations which allow you to test your understanding of calculations and conversions commonly found on the real PTCE ® .

Pharmacy calculations often require the use of common fractions. Fractions are expressed as part(s) of a whole and are composed of 2 basic numbers, a numerator (top number) and a denominator (bottom number). 5 See Figure 4. The above fraction, 2/3, may be converted to a decimal (or a number less than 1) by dividing the numerator by the denominator.
